## Soldupe Compatible Client Software

Soldupe works with any client software capable of processing WebDAV, CalDAV, CardDAV and XMPP. Basically you can try any client on any OS you want, the clients listed here are tested and guaranteed to be working with Soldupe.

### File Sync

You can either access Soldupe [via Web](#) or mount your Soldupe Storage via WebDAV or use one of the [Nextcloud](#) clients:

[Nextcloud Desktop Client for Windows, Mac & Linux](#)

[Nextcloud Client for Android](#)

[Nextcloud Client for iOS](#)

You can use your standard user / password combination to access File Sync, but we urge you to consider generating a dedicated password using [Nextclouds app-password generator](#)!

### Calendar / Address book Sync

If you're planning to use Soldupe as the only Cal-/CardDAV Backend, we recommend you to use the Soldupe Sync for Android.

[Soldupe Sync \(Google Play Store\)](#)

[Soldupe Sync \(openhardwareshop.eu / DRM free!\)](#)

Check out our [Soldupe Sync for Android configuration guide!](#)

If you need to synchronize your Android device with not only Soldupe but with several Cal-/CardDAV servers, we recommend you to use [DAVdroid](#):

[DAVdroid \(Google Play Store\)](#)

[DAVdroid \(openhardwarehshop.eu / DRM free!\)](#)

You can use your standard user / password combination to access Calendar / Address book Sync, but we urge you to consider generating a dedicated password using [Nextclouds app-password generator](#)!

More details can be found at the [Soldupe Sync Configuration Guide](#).

### Chat / Instant Messaging

[Conversations \(Google Play Store\)](#)

[ChatSecure for iOS \(iTunes\)](#)

[Xabber \(Google Play Store\)](#)

Use your login name combined with soldupe.im domain to login (and your standard password), for example: *user@soldupe.im*

## Jump Start Procedure - Details
